# Course Descriptions

Lunch & Learn

1

## Smile Design: The Perio-Restorative Interface

This one-hour course delves into the critical relationship between periodontal health and restorative dentistry. Learn how to effectively manage periodontal conditions and integrate restorative treatments for optimal patient outcomes.

Learning Objectives:

- Understand the key considerations and factors influencing successful outcomes.
- Learn how to effectively communicate to achieve harmonious results.

2

## Airway Collaboration: Expanding Smiles & Improving Health

This one-hour course delves into the importance of airway assessment and management in dentistry. Learn how to collaborate with sleep specialists and other healthcare providers to improve patient outcomes and overall well-being.

Learning Objectives:

- Discover how airway obstructions can impact dental health and overall well-being.
- Explore diagnostic techniques and collaborative approaches to address airway concerns.

3

## Transforming Lives: Simple Full-arch Implant Digital Workflow

This one-hour course will guide you through the process, from patient selection, planning and implant placement to final restoration. Learn how to streamline your workflow, improve efficiency, and enhance patient outcomes.

Learning Objectives:

- Explore advanced scanning, design, and fabrication techniques.
- Discover a step-by-step approach to streamline your full-arch implant cases.

4

## Why Recession Matters: Perio-Plastic Surgery Options

This one-hour course will delve into the causes, consequences, and available surgical techniques to address this common periodontal condition. Learn how to improve esthetics, function, and patient comfort through effective periodontal plastic surgery.

Learning Objectives:

- Discover the factors contributing to recession and its impact on oral health and aesthetics.
- Learn about the indications, techniques, and expected outcomes of different surgical approaches.

5

## Modern Periodontics: Diagnosis, Therapy & Achieving Health

Stay at the forefront of periodontal care with this one-hour course. Explore the latest advancements in periodontal diagnosis, therapy, and patient management. Learn about innovative techniques, evidence-based approaches, and strategies for achieving optimal periodontal health.

Learning Objectives:

- Discover cutting-edge methods for assessing periodontal health and identifying risk factors.
- Learn about the benefits and limitations of different therapeutic approaches, including surgical and non-surgical options.

6

## Implants: Maintenance & Peri-implantitis Protocols

Ensure long-term implant success with this one-hour course on maintenance and peri-implant care. Learn about best practices for implant hygiene, risk assessment, and early detection of potential complications. Discover strategies to optimize implant health and prevent peri-implant disease.

Learning Objectives:

- Learn how to educate patients about proper home care & identify signs of potential problems.
- Discover methods for monitoring implant health, detecting early signs of peri-implant disease, and implementing appropriate interventions.

Upon completion, each course is eligible for 1 CEU
